

MillionTM
Web Service

ABOUT US

MWS (Million Web Services) is a private company with key expertise in cloud computing, data center and IT infrastructure services. With a team of professionals and IT experts, Million Web Services offer hundreds of services in the domain of Managed Services, IaaS (Infrastructure as a Services), PaaS (Product as a Service), SaaS (Software as a Service) and AaaS (Analytics as a Service). Under these multiple platforms, Million Web Services offers plethora of domain-specific and enterprise-demanded services to fulfill the IT infrastructure needs of small and medium sized organizations.

With a keen focus on cybersecurity for cloud-based and data center services, MWS is internationally certified and complies to stringent security requirements both physical as well as virtual.

Million Web Services focuses primarily on the small and medium sized organizations that want to scale and thrive in this competitive technological landscape. We equip you with the most essential IT and Cloud infrastructure so that you can focus on your key business operations.

We are totally cost-competitive and our service offerings are both available in the form of suites and customized solutions that fit your need.

Contact us for more information and to explore possible ways to collaborate. Let's begin your journey towards success.
